[illegible]

The diagram illustrates the assembly of a window blind, divided into two main sections: **R** (Right) and **L** (Left). The assembly process is shown in seven numbered steps:

- Step 1:** Attaching the blind to the wall using screws (F) and a bracket (A). The bracket is shown being inserted into the wall and secured with a screw.
- Step 2:** Attaching the blind to the wall using screws (F) and a bracket (A). The bracket is shown being inserted into the wall and secured with a screw.
- Step 3:** Attaching the blind to the wall using screws (F) and a bracket (A). The bracket is shown being inserted into the wall and secured with a screw.
- Step 4:** Attaching the blind to the wall using screws (F) and a bracket (A). The bracket is shown being inserted into the wall and secured with a screw.
- Step 5:** Attaching the blind to the wall using screws (F) and a bracket (A). The bracket is shown being inserted into the wall and secured with a screw.
- Step 6:** Attaching the blind to the wall using screws (F) and a bracket (A). The bracket is shown being inserted into the wall and secured with a screw.
- Step 7:** Attaching the blind to the wall using screws (F) and a bracket (A). The bracket is shown being inserted into the wall and secured with a screw.

The diagram also includes callouts for parts 3, 4, 5, 6, and 7, which are used to identify the different components of the blind.
